is applied to the top surface of a thin strip of the gelatinous elastomer, the height of the strip can be compressed by approximately 25 percent of the height of the strip; and

further comprising a thin, distortable toroidal membrane having a smooth and regular surface which encloses the entire sealing pad in an airtight manner.

Goggles for isolation of a user's eyes from the outside environment (Amended) comprising [The goggles of Claim 1, further comprising]:

a frame including a transparent portion adapted to cover at least one of the user's eyes; .

a sealing pad adjacent to the frame, said sealing pad comprising a compliant and resiliently deformable gelatinous elastomer suitable to conform under pressure to form a substantially airtight seal between the frame and at least a portion of the user's face adjacent to the sealing pad; and an attachment means for removable attachment of the sealing pad to the frame.

(Amended) Goggles for isolation of a user's eyes from the outside environment comprising: [The goggles of Claim 62, wherein the frame consists of a thin sheet of transparent material.]

a flexible frame consisting of a thin sheet of transparent material which conforms generally to the shape of the user's face and is adapted to cover at least one of the user's eyes; and

a sealing pad adjacent to the frame, said sealing pad comprising a compliant and resiliently deformable gelatinous elastomer suitable to conform under pressure to form a substantially airtight seal between the frame and at least a portion of the user's face adjacent to the sealing pad.

REMARKS

The Office Action mailed on June 25, 1999, indicated the following:

- Claim 37 would be allowable if rewritten or amended to overcome the rejection under 1. 35 U.S.C. § 112, second paragraph, as set forth in the final rejection (paper no. 15).
- Claims 59 and 63 are incomplete because they depend from canceled claims but 2. would be allowable if rewritten in independent form.
